## **DETAILED ACTION**

1. The rejections set forth under 35 USC 101, 102, and 112 in the office action mailed 9/11/2006 are overcome by applicant's amendments.

## Statement of Reasons for Allowance

The present claims are allowable over the closest prior art Carlisle in view of Mishra for the following reasons: The present claims are drawn to a dispersant composition and a lubricant additive containing, in part, that dispersant composition. The dispersant composition is the reaction product of a compound containing an amine group, and a specified acrylamide. Carlisle teaches a lubricant additive comprising the reaction product of a polyacrylamide and a dispersant, where the polyacrylamide imparts viscosity index improving properties to the additive. The polyacrylamide is not the same as the acrylamide in the instant claims. Mishra teaches monoacrylamide monomers possessing dispersant properties. Due to the different functions of the acrylamides of Carlisle and Mishra, it would not have been obvious to one of ordinary skill in the art to substitute the monoacrylamides of Mishra for the polyacrylamide of Carlisle in the reaction of Carlisle. Hence, the combination of Carlisle and Mishra is not tenable.

In light of the above, it is clear that rejections of record are overcome and thus the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
